Child Development	ECE153	autumn	KIDE / ECE	This module will introduce students to the discipline of developmental psychology with particular focus on child development during infancy and early childhood. It will provide the theoretical foundation for key constructs, theories and developmental processes in perceptual, physical, social, emotional, creative, cognitive and language development. Attention will also be directed towards the pre-natal stages of development. Students will engage with relevant theories of learning and the role of the early years' educator in understanding and promoting positive child development. An ecological approach to child development will be discussed with particular emphasis on the immediate family context and early educational environments. There will be an emphasis throughout the module on translating theoretical knowledge into practice.			
Foundation Studies in Early Childhood Care & Education	ECE101	autumn	KIDE / ECE	This module is designed to introduce students to the area of early childhood care and education and provides students with an overview of the concepts and principles underpinning policy and practice, both nationally and internationally. The module provides an introduction to academic writing conventions, the use of information and communication technology to enhance learning, academic writing and research; accessing library resources; using the Moodle platform and the concept of 'digital citizenship'. The key elements of the early years educator as a professional are explored and analysed. Core areas will be addressed such as safeguarding children and child protection.	Pedagogy of Kindergarten 2	KIDE24NA06A09	III
					Pedagogy of Early Childhood	ECE24NA06A10	IV
Child, Family and Community 1	ECE102	autumn	KIDE / ECE	This module seeks to enhance students' understanding and appreciation of the relationship between the child, their family and community, with a particular focus on diversity and equity in early childhood. The purpose of the module is to deepen their understanding of the diverse societal influences that impinge on family today and how these impact upon the early years' setting and their work as early years professionals.	Family and Child Protection	ECE24NA08A04	III
Language Development in the Early Years	ECE103	autumn	KIDE / ECE	This module has been created to generate an understanding of the centrality of speech and language in the development of young children. Children's mastery of varied communication processes and the complexity of language learning are addressed within this module. This module also facilitates the student's appreciation of skills required by adults to enhance all aspects of communication in the early years.			
Child Health and Wellbeing 1	ECE154	autumn	KIDE / ECE	This module will equip students with the necessary knowledge and skills to enable them to provide a safe, supportive and healthy environment for young children as a foundation for lifelong health and well-being. Students will consider their role in promoting health and well-being in the early years, from an evidence-based perspective, in keeping with current legislation and policy.	Functional Anatomy and Study of Hygiene	KIDE24NA10A01	III
					Healthy Lifestyle and Sustainability Education	ECE24NA10A07	IV
Creative Arts in the Early Years	ECE201	autumn	KIDE / ECE	Students will explore media, techniques and processes used in the creative arts and consider how preschoolers communicate ideas and experiences. The safe use of art materials and resources will be addressed as well as practical considerations regarding the principles of architecture and design which enhance creativity in early childhood settings. There is a focus on exploring the concept and practice of creativity and expressing personal experiences creatively as a foundation to discussions on creativity across the early childhood curriculum. The delivery will include working with a variety of creative media and techniques in an individual capacity, in small groups and in collaborative work. As part of this module every student will collate a portfolio of creative practices.	Creation of Images and Objects	KIDE24NA12A03	III
					The Methodology of Bilingual Pre-school Education: Visual Arts Education	KIDE24NA01AM05	III
					Experience-Based Puppetry in the Nursery	ECE24NA12A02	III
Child, Family and Community 2	ECE202	autumn	KIDE / ECE	This module provides participants with an overview of international and national policies affecting early childhood care and education relative to the child, the family and the community; an overview of early childhood education infrastructural development in Ireland; an overview of the role of statutory and voluntary sector early childhood organisations relative to the child, the family and the community; an examination of the role of the educator relative to contemporary policy; an examination of the centrality of reflective practice in assessing the quality of institutional practices aligned to policy objectives relative to the child, the family and the community. The purpose of this module is to enhance students understanding of their role as practitioners in bridging the gap between home and school for the benefit of the child.			
The Early Years: Historical and Philosophical Perspectives	ECE203	autumn	KIDE / ECE	Students will be introduced to the historical development of the concept of childhood in Greek and Roman civilisations and trace the progression of this theme to the present day. Students will encounter the philosophical perspectives of some of the principal contributors to the enduring concept of 'childhood' including Jean Jacques Rousseau, Johann Heinrich Pestalozzi, Friedrich Froebel, Maria Montessori, Rudolf Steiner, the McMillan Sisters, John Dewey, Loris Malaguzzi and Howard Gardner. Students will apply conceptual analysis to specific discourses of early years education such as 'child-centred'; 'play', 'holistic development' 'educarer', 'values', 'inclusion' and 'profession'. Specific links will be made between the historical development of early years education, the work of significant philosophers of education and current policy and practice in the field of early years education.			
Sociological and Global Perspectives	ECE 254	autumn	KIDE / ECE	Students will encounter contemporary post structural sociological paradigms on childhood. This module will explore how early childhood discourse in Europe has evolved from the 4th to the 21st centuries and how typologies of contemporary childhood are evident in Irish ECCE policy. Students will reflect upon the social construction of childhood both nationally and internationally and identify global dichotomies in the lived experience of the child and family; children's work, the 'global child', the application of global standards in the form of the UNCRC and challenges associated with global equity. Students will develop an in-depth understanding of the relationship between structure, discourse and agency in sociology and how, through the process of socialisation, social structures such as gender, class and family can limit or enhance the child's agency in the early years.			

Leadership for Early Childhood Education and Care	ECE301	autumn	KIDE / ECE	In this module students explore the concept of leadership in early childhood education and care settings. Leadership does not reside in just one individual and in early childhood settings, it manifests in multiple ways, pedagogical leadership, team leadership, leadership for inclusion etc. Accordingly, knowledge and understanding of leadership styles, characteristics, core knowledge and skills are central to the professional formation of the early childhood educator.	Improving Professional Skills 2	KIDE24NA00A06	VI
STEM in the Early Years	ECE 350	autumn	KIDE / ECE	The purpose of the STEM (science, technology, engineering and mathematics) in the Early years module is to facilitate students to recognise and develop STEM-related concepts within the early childhood environment including developing awareness of key mathematical concepts (such as number, shape) scientific enquiry, problem-solving and critical thinking. This module will explore the integration of STEM into the early years setting; consider the unique role of the adult in the provision of a quality experience and enable the student to take responsibility for, and be an active agent in his/her own learning.	Mathematics and Its Methodology 1	KIDE24NA05A01	III
					The Methodology of Bilingual Pre-school Education: Science Education	KIDE24NA01AM09	V
Management 2: Early Childhood Education and Care: Leadership and Management	ECE401	autumn	KIDE / ECE	Early childhood management involves the fusion of theory, research, experience, application and knowledge. Leadership and management is endorsed through legislation, as a professional responsibility for managers and educators. Building upon Policy for Early Childhood Care and Education Management, this module focuses upon the roles and responsibilities of the early years manager as they relate to a range of management functions: legislative compliance (in multiple domains and disciplines); financial management; human resource management, performance management and change management.			
Advanced Issues in Child Psychology	ECE 402	autumn	KIDE / ECE	This module will advance students understanding psychological perspectives on child development. Students will be encouraged to critically examine contemporary issues in child psychology in depth. Students will also develop key skills in observation, analysis of children's verbal and written expression and dialogic pedagogy. The module will prepare students to become critical, reflective practitioners with well refined skills for understanding and scaffolding children's learning, wellbeing and development.	Pedagogical Psychology	KIDE24NA06A10	III
					Pedagogical Psychology	ECE24NA06A08	IV
Early Childhood Education – Curriculum, Research and Pedagogy	EDU352	autumn	KIDE / ECE	Exploration of the concept of curriculum as it relates to early childhood education; articulation of the guiding principles of curricular models for young children; interrogation of these principles in curricular models nationally and internationally such as Aistear (Ireland), TeWhariki (New Zealand), the Early Years Foundation Stage (UK), Early Childhood Education and Care (Finland) and Reggio Emilia (Italy); the application of sound pedagogical practice that recognises the role of play and the need for a balanced approach to be adopted between child-initiated and adult-initiated activity; understanding the links between Aistear, Siolta (National Quality Framework) and the Primary School Curriculum; exploration of the issues involved in the transition process from early childhood settings to the primary school classroom; exploration of the components of quality in the context of early childhood education with particular reference to Ireland's National Quality Framework for Early Childhood Education; critical analysis of a broad range of research in early childhood education and its implications for practice and investigation of the concept of early intervention and the evidence base for its effectiveness.	Research Methods in English	SZABV19-01-04	elective
					Research Methods	ECE24NA06A07	III
Play and Learning in Early Childhood Education	EDE 354	autumn	KIDE / ECE	Students will engage with the definitions and characteristics of young children's play; prominent theories of play and development and the various categories of play will be explored; the process of play development for children from birth to six years will be examined; the contribution of play to fostering the holistic development of the child with specific reference to Aistear and the Primary School Curriculum will be explored; the potential of play to contribute to children's learning will be emphasised; the role of both the indoor and outdoor environment in facilitating and supporting play will be considered; criteria for the selection of developmentally appropriate toys and play materials will be explored and Health and safety issues associated with children's play will be highlighted.			
Creative Music Making in the Early Years Curricula	ECE152	spring	KIDE / ECE	This module equips students with knowledge(s) practices and values relating to the provision of creative music-making experiences in the early years. It supports students to: explore the theoretical and policy context for creative music-making in the early years; develop an understanding of its value in the holistic development of the child; assist the student to experientially develop their own creativity through music; enable the student to design developmentally appropriate creative music-making opportunities for children in the early years; consider the unique role of the adult in the provision of quality musical experiences; discuss the student as a reflective practitioner; enable the student to take responsibility for, and be an active agent in his/her own learning.	Music Education and Methodology 2	KIDE24NA02A04	IV
					The Methodology of Bilingual Pre-school Education: Music Education	KIDE24NA01AM10	V
					Supporting of Development by Music 3	ECE24NA02A04	VI
Curriculum and Pedagogy (birth to three)	ECE 403	spring	KIDE / ECE	This module will provide students with the opportunity to explore how the curriculum and pedagogical practices can be adapted to meet the unique needs of infants and toddlers in early childhood care and education contexts. The early childhood curriculum framework Aistear (NCCA, 2009) incorporates children from birth to six years. This module will allow students to develop the competencies needed to plan, facilitate and evaluate a curriculum which supports all infants and young children reaching their potential.	Pedagogical Practice in Early Childhood	ECE24NA06A11	IV
The Role of Play in Development	ECE 104	spring	KIDE / ECE	This module will provide students with the opportunity to understand how play contributes to children's development in the early years. As the early years curriculum framework Aistear (NCCA 2009) identifies play as a key context through which children will develop as confident and competent learners, understanding the role of play in development is prerequisite to designing a high quality early years curriculum.			

Child Family and Community 2	ECE 202	spring	KIDE / ECE	This module provides participants with an overview of international and national policies affecting early childhood care and education relative to the child, the family and the community; an overview of early childhood education infrastructural development in Ireland; an overview of the role of statutory and voluntary sector early childhood organisations relative to the child, the family and the community; an examination of the role of the early years professional relative to contemporary policy; an examination of the centrality of reflective practice in assessing the quality of institutional practices aligned to policy objectives relative to the child, the family and the community. The purpose of this module is to enhance students understanding of their role as early years professionals in bridging the gap between home and school for the benefit of the child.			
Models of Curriculum	ECE 251	spring	KIDE / ECE	In this module students will explore the concept of curriculum in relation to early childhood care and education; the guiding principles of curricular models for young children; application of these principles in practice in curricular models nationally and in a range of other countries including New Zealand, the US, the UK, Scandinavian and other European countries, an introduction to the concept of intervention models in early childhood care and education; examining the influences on early learning and development including historical and cultural contexts; introduction to some of the pioneers of early childhood education e.g. Froebel, Montessori, Steiner, Malaguzzi (Reggio Emilia) and the implications of Piaget and Vygotsky on practice in early childhood settings.			
Educational Psychology	ECE 252	spring	KIDE / ECE	This module will introduce students to the field of educational psychology. The course will provide an introduction to the field of educational psychology and will examine how psychological theories can be applied to the understanding of early childhood care and education. More specifically, the course seeks to explore how motivation theories, attachment theories, ecological theories, behavioural and socio-cognitive theories can be used to create a positive learning environment for young children. The course aims to support students in managing behaviour and in understanding how to create environments which foster children's learning and development. This module adopts a preventative, positive framework for supporting the behaviour of children in early childhood settings. It will equip them with the knowledge and skills to use psychological theory as a tool for reflective practice.			
Child Health and Well-being 2	ECE204	spring	KIDE / ECE	In this module students will explore the concept of wellness in ECCE and the implementation of Aistear in practice with particular reference to the themes of well-being and identity & belonging and to the aim of children being 'healthy and fit' in practice. Promoting rudimentary and fundamental movement skills in young children. Identify major child public health problems such as the rise of obesity and consider practical strategies to address obesity in practice. Examine common chronic conditions in children such as asthma and allergies, skin conditions, diabetes and epilepsy and address best practice in terms of management of these conditions; introduction to genetic and congenital disorders and developmental delay; explore children's understanding of and perspectives on health and well-being and the impact of illness on families.	Healthy Lifestyle and Sustainability Education	ECE24NA10A07	IV
Including Children with Special Needs in the Early Years	ECE354	spring	KIDE / ECE	This module is designed to consolidate and further develop the students' existing knowledge, understanding and skills related to meeting the needs of children with special needs in the early years. The purpose of this module is to equip the students with the knowledge, skills and attitudes to become collaborative early years educators in order to provide the best possible outcomes for children with special needs. Students will be provided with opportunities to develop an understanding of children with special needs and create a supportive early years environment. They will also develop a range of strategies to identify and provide appropriate support for these children at the critical early stages of development. The module is situated within the concept of partnership with families, other professionals and the wider community.	Introduction to Special Education	ECE24NA06A09	IV
Language and Literacy in the Early Years	ECE 253	spring	KIDE / ECE	Students will revise and consolidate their understanding of language development in young children. Current theories of language acquisition will be explored with reference to recent research in the field. The significance of language and literacy within Aistear: The Early Childhood Curriculum Framework will be presented. The role of the early years educator in enhancing all forms of communication in the early years setting will be investigated through the analysis of effective techniques to stimulate language interaction between the adult and child. Students will discover how multiple early literacy experiences such as book sharing, mark-making, engagement with digital media, playful singing/rhyming activities and literacy-rich environments contribute to the emergent reading and writing skills of young children. The features of bilingualism and multilingualism in young children will be reviewed with a particular emphasis on how educators support the learning of additional languages in early years environments. Students will identify the challenges of speech language and communication needs (SLCN) in the young child and will review the importance of collaboration with family and other professionals.	English Language Children's Literature 1	KIDE24NA01AM06	III
Curriculum and Pedagogy (3-6 years)	ECE 451	spring	KIDE / ECE	This module will provide students with the opportunity to develop the pedagogical skills required to develop an emergent and inquiry-based curriculum for preschool aged children. Exploring the role of the early years educator as a pedagogical leader through identifying the knowledge, dispositions, skills and abilities that early years educators' need to provide a high quality preschool curriculum; using Aistear to construct an emergent and inquiry-based approach to curriculum for preschool children; using children's interests and prior learning as starting points for curriculum planning; strategies which build on the individual learning needs and play interests of all children during the preschool years; assessment practices which support the learning and development of children three to six with an emphasis on developing child-led methods of assessment; the role of Aistear in connecting old and new ways of learning as children transition from pre-school to the infant classroom; national and interactional empirical research evidence on high quality pedagogy and curricula for children under three.			
Research Methods	ECE 352	spring	KIDE / ECE	Building on students existing knowledge and experience, this module is designed to introduce students to paradigms of research with a particular focus on situating the paradigms of research in early years care and education policy and practice The module focuses on developing the concept of the early years educator as researcher and provides students with the knowledge, understanding and skills to develop a proposal for a small research study located in an area related to early years education.	Research Methods in English	SZABV19-01-04	elective

Cultural and Linguistic Diversity: Implications for Professional Practice	ECE 353	spring	KIDE / ECE	This module explores the critical issues facing teachers and young children in contexts of increasing cultural diversity in Ireland; the interactivity of race, ethnicity, gender, class, ability and community; the twin and interrelated themes celebrating diversity in young children's lives and confronting social injustice and oppression; culturally and developmentally appropriate teaching and learning approaches; the immersion method of language acquisition. The purpose of this module is to enhance student's ability to teach for cultural and linguistic diversity in our ever-changing early years landscape in Ireland.			
Governance and Management in Early Childhood Education and Care Contexts	ECE460	spring	KIDE / ECE	This module builds upon students' knowledge and understanding of the concept of leadership in ECEC contexts. With a specific focus upon Governance and Management in ECEC, it explores quality in practice, essential characteristics of effective management approaches, styles and practices; multi-professional team work in ECCE, sociological understanding of the organisation of work; sources of conflict and, constructive approaches to conflict management in ECCE, effective implementation of change; action research to facilitate decision making and problem solving; development of reflective analysis of policies and mechanisms of institutional quality in accordance with national standards and regulations			
Advanced Studies in Play and Child Development	ECE461	spring	KIDE / ECE	This module will advance students' understanding of the psychological underpinning of young children's thinking and cognitive development with particular attention to the role of playful interactions. This module will provide students with an opportunity to critically engage with interdisciplinary perspectives on play and to consider the various applications of play theory and research. Students will be encouraged to critically examine contemporary empirical research in this area and make links with practice. Students will develop key skills in engaging in playful interactions, and sustained shared thinking with young children. The module will prepare students to become critical, reflective practitioners with well refined skills for understanding and scaffolding children's learning, wellbeing and development
